I am a software engineer with 3+ years of experience, passionate about web development, cloud, blockchain, and machine learning. I excel at solving complex logical puzzles, love learning, and thrive on facing new challenges. I am highly organized and dedicated to finding efficient solutions to concurrent problems, ensuring both quality and performance in my work.

PROFESSIONAL EXPERIENCE

PARIVEDA

Software Developer Consultant

Bogotá, Colombia

November 2025 - Now

- Developed **testing automation scripts using Playwright**, reducing manual execution time and deployment delays across environments.
- Presented findings and proposed improvement ideas** to the team, contributing to **better technical and process decisions**.
- Contributed to **AWS partnership initiatives** by earning the **AWS Promoter role** within the project and participating in **hackathon-style events** to strengthen the use of **DevOps tools and practices within the Cloud**.

BUCKS

Full Stack Developer

Bogotá, Colombia

July 2024 - September 2025

- Mentored and organized the frontend team**, managing a full redesign of the platform's UI, reducing average user workflow steps by **40%** aligning delivery with business needs.
- Migrated **more than 8 AWS Lambda functions** to **Dockerized microservices**, reducing cold start latency by **70%** and cutting deployment times from **10 to 2 minutes**, improving scalability and release speed.

TALLERES ESPERANZA FOUNDATION

Teacher and web developer (Internship)

Bogotá, Colombia

July 2024 - November 2024

- Delivered over **20 hours** of training in office automation and digital literacy to **15+ individuals with intellectual disabilities**, employing inclusive pedagogical strategies adapted to varied cognitive needs.
- Designed and launched a **full-stack snack inventory management web app** using **Angular and FastAPI**.

FREELANCER PROJECTS

Bogotá, Colombia

October 2024 - March 2025

- INNOVATECH CONSULTING & SERVICES**
 - Led the implementation of the **Opportunities module UI** using **React, TailwindCSS, Shadcn/UI**, and **Google Maps**.
- TECFICON**
